

RANGE SKEWERS

SQUARE / RECTANGULAR

KAP

DESCRIPTION :

Automatic machine to load the skewers automatically into the skewer tube assembly. This machine allow to save 1 or 2 people on a production line.

The KAP can be joined to the following skewering machines : EAB01, ELB01, EABS, EABSE, EABK, EAB2S, EAB2SE, EAB2K...

Skewering Kebab Line "High Productivity"

ADVANTAGES :

Working station to optimize the movements and moving of the operators.

The productivity of the machine is optimized to follow the production of the kebabs on EMSENS skewering and cutting machines (EAB01, ELB01 and the whole range).

Minimum space on floor.

A touch screen makes the communication easier between the operator and the machine. The screen includes a self-diagnostic system displaying a picture of the faulty component for example.

TECHNICAL FEATURES :

Cycle time of the machine : 20 seconds (± 2 sec according to the section of the kebabs)

Autonomy : about 45min (10000 skewers fit in the hopper)

Power : electrical control and pneumatic power

Materials : stainless steel and polymers

This material is in conformity with the following directives and bills :

Food contact : EC1935/2004

Good manufacturing practice : EC2023/2006

Machines : EC2006/42

CEM : EC 2004/108

Situated near Saint-Etienne (Loire – France), Emsens has been designing and manufacturing machines for the food industry. Equipped with its own technical department, Emsens has the know-how to create machines able to answer to all the requests of its customer. The range of machines developed by Emsens specialized technicians includes : Skewering kebab machines (home-made looking, square or rectangular, manual or automatic skewering), cubing and dicing machines (bacon stripes, stamps, matches), osso buco cutting machine, automatic tray dispensers or even binding salami machines.
