

EMSENS

Today,
the machine
of tomorrow.

SAUSAGES

ATE02

This machine allows the individual knotting of bowels with a string made with cotton or/and cotton-polyester after stuffing. The knot is a capstan type knot. The knotting can be : single knot with short bind and long bind, single knot with 2 short binds, tying with loop (loop length from 8 to 15 cm), sausage/salami tying by pair (bind length from 25 to 40 cm)
Machine on small castors.

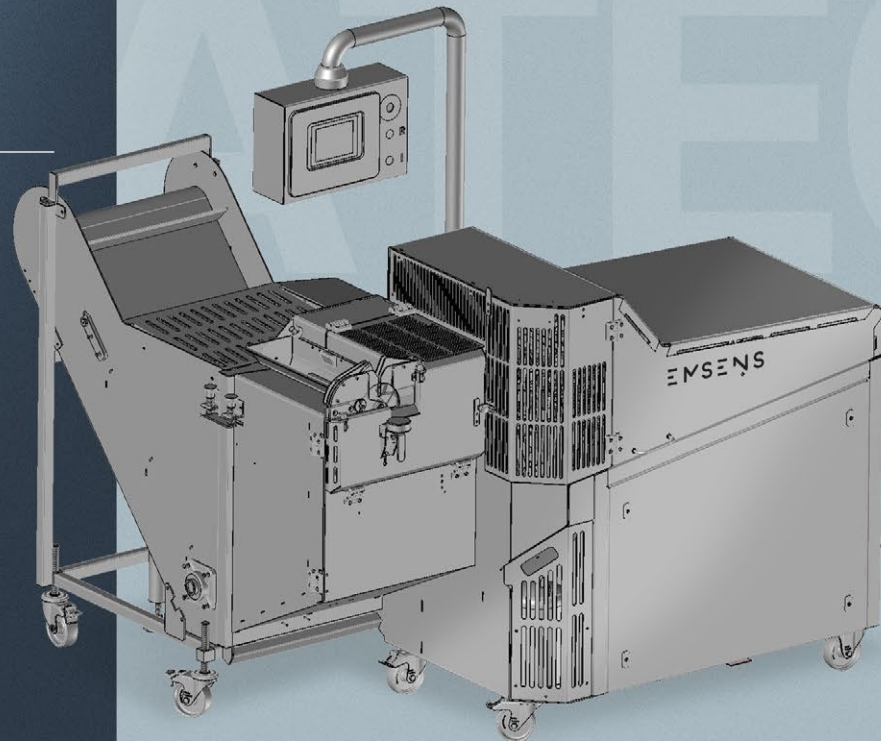

Productivity: about 20 knots per minute
Diameter capacity: from 20 to 100 mm

The productivity information is only indicative. A study can be made with your specifications.

This material is in conformity with the following directives and bills:
Food contact: EC1935/2004,
Good manufacturing practice: EC2023/2006,
Machines: EC2006/42, CEM : EC 2004/108

Easy to pass from a knot type to another.

- This machine flexible with many settings allowing to adapt different kinds of strings.
- The bowel surplus is quickly excluded.
- Possibility to work with 2 operators
- Possibility to adapt and adjust material according to special requirements of the client.
- Ergonomics of the post optimizing the operator's gestures and movements.
- Product evacuated thanks to an exit belt.
- Easy to clean thanks to the design made according to agri-food requirements.
- Respect of the security standards.
- Adjustable cadence.
- Respect des normes de sécurité.
- A screen touch allows a better communication between the operator and the machine with an intuitive interface equipped with a troubleshooting.
