# HYDRAULIC PRESS

Machine to press and shape pork bellies at a temperature of around  $-7^{\circ}\text{C}$  ( $\pm 2^{\circ}\text{C}$  depending on the salt concentration).

This machine also allows the pressing and shaping of other meats: pork loin, beef liver depending on the tools chosen.

**Productivity :**  
5 to 8 products per minute (Cycle time of about 10 seconds).  
**Loading chamber capacity :**  
700 x 360 x 120 mm

**The productivity information is only indicative. A study can be made with your specifications.**

**This material is in conformity with the following directives and bills:**  
Food contact: EC1935/2004,  
Good manufacturing practice: EC2023/2006,  
Machines: EC2006/42, CEM : EC 2004/108

Ergonomics of the loading station optimizing the gestures and movements of the operators.

- This machine is flexible. It is possible to adjust the hydraulic pressing power of each movement (width – length – thickness).
- The EMSENS press is an industrial tool which allows to conform 5 to 8 products per minute.
- The belly is introduced and ejected after pressing at the same station.
- Ease of cleaning linked to a design taking into account agri-food constraints.
- A touch screen makes the communication easier between the operator and the machine. The screen includes a self-diagnostic system displaying a picture of the faulty component for example.
