CUBES RANGE / BACON / STRIPES / STAMPS

MDL02

Machine designed to dice bacon stripes out of bacon pieces at a temperature of about -12°C ($\pm 5^{\circ}\text{C}$ according to the concentration in salt). The automatic belt allows the loading of the machine.

Productivity:
2 200 kg/h for bacon
pieces of about 4.0 kg
Capacity:
700 x 360 x 120 mm

This material is in conformity with the following directives and bills:

Food contact: EC1935/2004

Good manufacturing practice: EC2023/2006

Machines: EC2006/42 CEM: EC 2004/108

- This machine offers a top-quality cutting which became THE reference onto the bacon stripes market. It includes a hydraulic press which allows to dice bacon pieces with a maximum bending of 120 mm.
- The machine uses the EMSENS patented cutting device with 6 cutting tools by disk.
- The MDL02 is a machine designed to dice over 2200 kg of bacon stripes/hour (calculation based onto a bacon piece of 4.0 kg/unit).
- The automatic belt allows a maximum productivity of the machine thanks to a fast loading. The exit of the products is done with a vibrating belt.
- The distinction between waste and good products is done automatically thanks to a specific belt.
- The machine is easy to clean and takes into account the constraints of the food industry.
